

Cash Drawer Processing Solutions

Save time counting down cash drawers

Cash till processing as easy as 1-2-3

Our industry-leading currency and coin processing devices combine with hardware accessories to offer the most comprehensive back-office cash till processing solution available. Our cash drawer processing solutions make processing tills fast and easy, and it saves businesses time and money.

Closing out a cash drawer at the end of the day or a shift can be lengthy and tedious. Each drop must be counted precisely because whether it's cashier or register accountability, people are responsible for totals. You need a solution that quickly, easily and accurately counts down each till and prepares you for the next shift.

Cummins Allison offers several solutions to help you process your tills faster and more efficiently, so you can use your time more effectively in other areas.

The JetSort® coin sorter integrates with the JetScan iFX® currency scanner or the JetScan® currency scanner to build a solution right for your business.

Process the entire till in minutes

Our solutions integrate industry-leading currency counting and coin sorting devices into a complete solution making processing tills fast, easy and efficient. Add other media to the count, such as skims (pulls or bleeds), rolled coin, or vouchers. The system counts the cash and coin and reports the totals on a single report, making quick work of drops.

Reduce coin deposit and purchase fees

As coins are counted by the JetSort, they are returned into the correct coin space in the till. Recycling coin lets you save on coin deposit fees and on rolled coin purchases.

Count down the cash till, rebuild the float amount, and process the deposit – all in less than two minutes.

Three simple steps to counting the cash drawer

Streamline till processing with the Cash Drawer Processing System

The Cash Drawer Processing System not only counts the entire till, it also helps rebuild the float (till bank). The user is instructed exactly how much coin and cash to adjust so that the till is brought back exactly to its starting amount. You'll increase count accuracy and eliminate human error – balancing accurately and avoiding wasting time from examining discrepancies.

Step 1: Pour the coin directly from the till

A JetSort coin sorter featuring a special hopper takes coins directly from a till. No till cups and no scooping coins out of the till.

Step 2: Sort the coin directly back into the till.

The till refill kit sorts coins back into their proper coin till areas. This reduces coin deposit fees as well as rolled coin purchases.

Step 3: Count currency to get a complete total.

The JetScan currency scanner quickly counts the mixed currency (no presorting required) and transfers the count to the JetSort providing you with one concise batch report.

How much time can be saved?*

Look to see how much time a typical site can save using the Cash Drawer Processing System over a manual process.

	Manual Process	Cash Drawer Processing System
Balancing a typical drawer	5	2
Typical number of drawers	x 15	x 15
Time spent counting drawers daily	150 minutes	30 minutes
Time to prepare a deposit	45	15
Number of daily deposits	x 3	x 3
Time spent preparing deposits daily	135 minutes	45 minutes
Time savings		90 minutes per day

*In minutes, based on timed observation in a national fast-food restaurant

The fastest, most complete balancing solution

Process cash with the
JetScan iFX scanner

If you need to process cash, consider adding the JetScan iFX currency scanner. This single device is the fastest, most accurate currency processor available. When connected to a JetSort coin sorter, you'll have a complete solution to process and prepare currency and coin. Studies show you can save up to 89% of counting time with this solution.

Process deposits with greater efficiency and security

Save time preparing deposits

JetScan iFX and JetSort make back-office processing easy, fast and accurate, allowing you to spend more time doing more productive tasks. View the chart to see how real stores save time with the JetScan iFX and JetSort 1000 solutions.

Dramatic trial results using JetScan iFX*

Trials #	Envelopes	Manual Operation mm:ss	JetScan iFX	Time savings	Percent savings
1	29	12:42	1:50	10:52	85%
2	15	12:08	1:16	10:52	89%
3	35	20:46	4:23	16:23	79%
Totals	79	45:36	7:29	38:07	84%
