

JETSCAN® MPX 8200 SOFTWARE SUPPORT AGREEMENT

Safeguard Your Investment

SOFTWARE SUPPORT AGREEMENT

- Never miss an upgrade
- Keep your equipment performing at its best
- Receive support with diagnostic assistance from software professionals

Keep your operation running at peak performance with software support.

Greater efficiency and time savings are gained using advanced solutions like the JetScan MPX 8200 multi-pocket sorter. While not as tangible as hardware, the complex functionality and enhancements that deliver improvements to counting, sorting, denominating and strapping large volumes of cash at high speeds are software-based. And JetScan MPX 8200 software is continually enhanced through upgrades to accommodate improvements, new requirements and general maintenance.

We recommend our customers protect their investment with the advantage of an annual software support agreement. This guarantees you will receive the latest updates and advancements to keep your equipment performing at its best.

Software support includes:

- JetTouch® user interface and existing feature enhancements
- Phone, e-mail, or onsite support with diagnostic assistance from software experts
- Software-related machine enhancements, such as improved no call rates, enhanced note algorithms, and advances in denomination and authentication
- Enhancements in ticket imaging
- Continuous batch processing improvements
- Support for new Canadian currency patterns
- Networking assistance
- Quality enhancement patch releases

Even customers performing their own equipment maintenance will strongly benefit from the software support agreement, with immediate support for software updates and networking assistance on software related issues.

Committed to customer satisfaction

Cummins Allison's nationwide network of local service and support professionals are committed to your satisfaction. Together we're all here to ensure your equipment continues to strengthen the efficiency of your operation.

Keep your equipment performing at its best and its software up-to-date. To find out more about a Software Support Agreement, please contact your local sales representative.
