

CUMMINS

A comprehensive tool for capturing and reporting transactions, the JetTouch® Workstation manages the totals of currency, coin, checks, coupons, tickets and other non-cash media.

JetTouch® Workstation

The JetTouch Workstation is shown with an optional printer and the JetScan 4091 – ideal for casinos or any business application processing currency and/or bar-coded media.

JetTouch Benefits:

Fast, Efficient & Accurate

Save time by processing your transactions with the JetTouch Workstation. The JetTouch workstation can be used as a stand alone system, in conjunction with other Cummins currency sorting products, or networked together to provide combined data to your operations host computer system.

Easy To Use

Large user icons provide a tactile feel for fast and easy entry of data. Automatic screen prompts allow operators to enter data with minimal keystrokes. Utilizing screen prompts and icon driven menus, training is minimized while operating efficiency is maximized. Currency totals are automatically transferred from the JetScan Currency Scanner to the currency entry screen.

Flexible

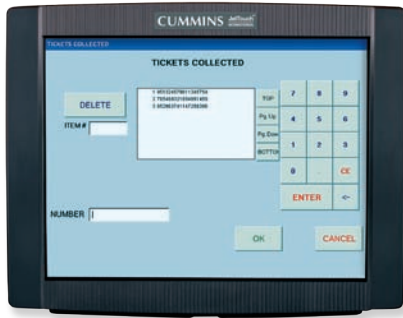

The JetTouch application software can be configured to match your processing needs - you can define up to 6 different operating types. You define password controls, transaction and account information, additional media entry and reports. Additionally, several operating modes can be defined and stored to memory. Different operating modes can be used depending on the type of processing required.

Compact

The JetTouch Workstation is a compact, all-in-one solution with an integrated 15" touch screen display. The JetTouch application software uses the latest in touch screen technology – no need for a large desktop PC with a keyboard, mouse and bulky monitor!

JetTouch® Workstation

The JetTouch Workstation is shown here with a Cummins JetScan 4062 and JetSort 1000. This configuration is frequently used in retail applications - coin and currency totals are automatically sent to the JetTouch, while checks, coupons and other media can be entered manually.

Data Entry Screen

Features

Built in Reports

The JetTouch Workstation records all transaction activity and provides reports and totals, which can be viewed, printed or exported on demand.

Data Entry

Additional media types such as coin, checks, coupons, tickets, store money, chips and other media can be entered and recorded for the transaction. Coin and currency totals can be automatically transferred from any Cummins sorting equipment. Account data information can be entered into up to five fields as well as a declared total amount for the transaction to balance against.

File Exporting and Interfacing

Files are exported via a network connection or serially with a variety of data exporting options. The JetTouch Workstation also offers direct interfaces to many financial, gaming and retail host software systems.

Dual Count Mode

The JetTouch Workstation allows the user to process each transaction in a Dual Count mode for double verification and added accountability. With Dual Count mode enabled, a transaction can not be completed until totals from the first count and second count match.

Supports Multiple Devices

JetScan, JetSort, printers bar code scanners, and networks. An external display can also be connected for surveillance purposes.

Specifications*

- 15" Adjustable LCD touch screen color monitor
- 1.2 Ghz Processor, 40 Gig hard drive
- 256MB Ram
- Windows XP operating system
- Small footprint (W x D x H):
12" x 15" x 12"
30.5cm x 38.1cm x 30.5cm
- Weight: 19 lbs. (8.6kg)
- 4 Serial Comm. Ports, 1 Parallel Comm. Port
- 10/100 Mb Ethernet network card
- 4 USB Ports: 2 in front, 2 in back
- PS/2 mouse and keyboard ports
- Additional VGA Port for external display support
