

# Preventative Maintenance Agreements

## Quality products backed by quality service

All machines require some care and maintenance. Parts that move need periodic cleaning, lubrication and adjustment for maximum productivity and long life.

With the purchase of any Cummins Allison product, you have access to our direct service organization for as long as you own your machine.

Cummins Allison owns and operates sales and service offices across Canada for prompt, experienced, local support of all Cummins Allison products.

Factory trained personnel using factory parts are ready and able to provide preventative maintenance and emergency service at your place of business.

## Quality products need quality service

Cummins Allison products are designed to provide maximum productivity with the minimum of care and maintenance.

The Cummins Allison Preventative Maintenance Agreement (PMA) reduces operating costs by extending the productive life and increasing the reliability of these products.

## How the Cummins Allison PMA works

Your covered equipment is inspected and serviced on your premises on a scheduled basis. This includes partial disassembly; vacuuming, wiping and cleaning; plus lubrication and adjustments to factory specifications. Parts are replaced when needed to prevent possible breakdowns. The machine is thoroughly tested to assure it is in optimum working order.

Emergency service for problems between scheduled visits is free.

# Cummins Allison PMA benefits\*

- Scheduled inspections find and fix little problems before they become big, unscheduled problems.
- The equipment operates at peak efficiency.
- The useful service life is extended for a better return on investment.
- Maintenance costs are easy to budget. A known cost (fixed for one year) can be scheduled into budgets – no big surprise expenses.
- There is no charge for emergency service during normal working hours.
- Cummins Allison schedules the maintenance so you don't have to worry about it.
- The average PMA contract expense is usually less than two emergency calls and it includes cleaning, lubrication and adjustments to keep the equipment running at peak efficiency.

\* Most Cummins Allison PMA contracts include all of the listed elements. However, some special contracts for some products do not. See the actual contract form for details.

There are “insurance policies” that may cover the costs of emergency repairs. While they may cover

some of the costs, they do nothing to prevent unexpected failures.

**There is no better protection for your equipment than the Cummins Allison PMA plan**

PMA not only covers the costs to fix a breakdown, it prevents breakdowns through scheduled preventative maintenance and keeps your equipment like new.

Cummins Allison does not authorize any third party companies to service Cummins Allison products in North America. Anyone claiming to service Cummins Allison products has not been trained or equipped by Cummins Allison and does not have up-to-date technical data on our products.
